## Projects

### **Blaze Booking Site:** (Frontend/Backend)

Fyyur is a musical venue and artist booking site that facilitates the discovery and bookings of shows between local performing artists and venues. This site lets you list new artists and venues, discover them, and list shows with artists as a venue owner.

### **Trivia App:** (Frontend/Backend)

Trivia Api is a family friendly game that allows you to display, delete and add trivia questions. The user can search for questions by keyword, and also play the game with the ability to randomize all the questions or a specific genre of questions.

### **Responsive HTML Email:** (HTML Email)

Dark Mode friendly Responsive HTML Email that renders across 80+ Email Clients.

## Education

**University of Texas at Arlington**

*Computer Engineering*

**Tarrant County Community College**

*Associates of Arts*

## About Me

It all began with my first console log of "Hi, I'm Paul". That small step into the developer world was all it took for me to realize this is something I can see myself doing for a really long time. For years I've always been intrigued by computers and technology, but once I began to understand the origin and process of how everything is really created behind the scenes I knew I was hooked. My passion did not begin in one day, but as I slowly consumed the basics and built an appetite for more I realized that this career is full of endless information which truly sparked a fire within me.
