Tarrant County Community College

Associates of Arts

SKILLS

LANGUAGES: HTML5 / CSS3 / Javascript / Python(Flask)

TECHNOLOGIES: PostgreSQL / Github / REST API / Figma / Adobe Photoshop / AWS / Bootstrap

ADDITIONAL: Unit Testing / Deployment / Agile / Customer Service

ABOUT ME

Since I was young I've always gained satisfaction from being able to take things apart such as game consoles, toys, laptops, etc. That need to problem solve has always been apart of me and that is what originally gravitated me towards software development. For years Ive always been intrigued by computers and technology, but once I began to understand the origin and process of how everything is really created behind the scenes I became hooked. My passion for problem solving did not begin in one day. But as I slowly consumed the basics and built an appetite for more, I realized that this career is full of endless information and I can see myself doing this for a long time.
